

# SAMPLE PLATE REQUEST FORM

Anocoil can produce sample plates using a standard GATF form or customer supplied files. If you wish to receive plates using a standard target please fill out Section 1. If you wish to receive plates using a customer supplied file please fill out Section 2.

CUSTOMER NAME \_\_\_\_\_

PRODUCT  830T  N-100 PLATE SIZE (L) \_\_\_\_\_ (W) \_\_\_\_\_ (T) \_\_\_\_\_

## SECTION 1

Please select from the following:

- GATF commercial target using 175 line screen - centered on plate
- GATF commercial target using 175 line screen - offset from lead edge by \_\_\_\_\_
- SNAP newspaper target using 100 line screen - centered on plate
- SNAP newspaper target using 100 line screen - offset from lead edge by \_\_\_\_\_

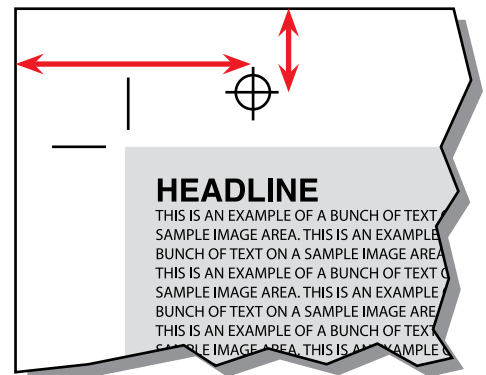

## SECTION 2

Due to internet security issues, Anocoil does not maintain a site to deliver files electronically. For us to receive a digital file, the customer has the option of providing a disk, allowing us to access your FTP site or using an internet file transfer service. If you wish to use your FTP site or an internet service please provide:

Internet site or address (URL) \_\_\_\_\_

LOGIN or ID \_\_\_\_\_ PASSWORD \_\_\_\_\_

Anocoil accepts two standard types of files for production of plate samples. These are Acrobat PDF and 1-bit TIFF. Due to the fact that TIFF's have your screening, dot, angles and gain curves, this is the preferred file type. Regardless of the file type, you must define the position of your file on the plate. Please provide the offset from the edge of the plate to your image in the TIFF or PDF. It works best if this is a stationary mark for registration or crop. It is acceptable to simply write "center image".

Offset from right edge of plate \_\_\_\_\_

Offset from top edge of plate \_\_\_\_\_

You are required to complete this section ONLY if you send a PDF.

Screen value (lpi or microns) \_\_\_\_\_

Dot shape  Round  Square  Euclidean  Elliptical

Screen angles C \_\_\_\_\_ M \_\_\_\_\_ Y \_\_\_\_\_ K \_\_\_\_\_

**VERY IMPORTANT:** Please do not send individual PDF's that have not been imposed. Simply export a fully imposed PDF out of your imposition software.
